PROFESSIONAL SUMMARY

Python Full-Stack Developer with an MSc in Computer Science, specializing in FastAPI, Next.js, and PostgreSQL. Built and shipped Stryk, a live football analytics platform at [stryk.games](#), with async APIs, cloud deployment, and real users. Seeking a junior backend or Full-stack developer role to apply production grade API and full-stack expertise in a growth oriented team.

TECHNICAL SKILLS

Programming Languages: Python, TypeScript, JavaScript, SQL, C#, HTML5, CSS3

Frameworks & Libraries: FastAPI, REST API, SQLAlchemy (Async), Pydantic, Next.js, React, Tailwind CSS, ASP.NET Core

Databases: PostgreSQL, MongoDB, SQL Server, Azure SQL

Authentication & Security: Clerk Auth, JWT, Role-Based Access Control (RBAC)

Tools & Platforms: Azure App Service, Vercel, Railway, GitHub Actions, Sentry, Cloudinary, Swagger, Git, Docker

PROJECTS

STRYK — Football Identity & Analytics | Python, FastAPI, Next.js, Postgres March 2026 – Present

- Architected and deployed a full-stack platform with FIFA-style player cards, match statistics, lobbies, and leaderboards – live at [stryk.games](#) with **15+ active users** tracking stats after real matches.
- Engineered **15+ async RESTful API endpoints** using FastAPI, Pydantic, and SQLAlchemy Async on PostgreSQL for profiles, match creation, squad balancing, and notifications.
- Built a responsive, mobile-first frontend in Next.js (App Router) with TypeScript and Tailwind CSS, featuring dynamic player cards and interactive profile editing.
- Designed an image pipeline using Cloudinary SDK and Pillow, converting to 3x-resolution WebP, **reducing storage by 60%** without visible quality loss.
- Implemented CI/CD via GitHub Actions with auto-deployment to Vercel (frontend) and Railway (backend + PostgreSQL).

Samaan — Grocery Delivery Platform | C#, ASP.NET Core, Azure SQL December 2025 – Present

- Developed a **3-role** grocery delivery system (Customer, Merchant, Admin) backed by ASP.NET Core Web API (.NET 8) and Azure SQL with **4 entity models**, supporting end-to-end order management across roles.
- Implemented JWT authentication with RBAC; deployed to Azure App Service with Swagger-documented RESTful endpoints, reducing manual API testing time by eliminating undocumented endpoints.

EDUCATION

PVG's College of Science and Commerce, SPPU

July 2023 – June 2025

Master of Science in Computer Science

Pune, Maharashtra

PVG's College of Science and Commerce, SPPU

July 2020 – June 2023

Bachelor of Science in Computer Science

Pune, Maharashtra

CERTIFICATIONS

- MongoDB Associate Developer (Python) June 2026
- AI Engineer for Developers Associate May 2026
- Microsoft Azure Fundamentals (AZ-900) February 2026
- Google UX Design August 2025

PUBLICATIONS

Ad Content Optimization for E-Learning Apps Using NLP [🔗](#) | JETIR

March 2025

- Applied NLP techniques (sentiment analysis, keyword extraction) to optimize ad targeting for e-learning apps across Indian social media platforms. Published in **UGC Approved Journal** (Impact Factor: 7.95) | **178+ Downloads** | Paper ID: JETIR2503359

ADDITIONAL INFORMATION

- Professional Training:** Completed a project-based frontend OJT — designed and developed responsive UI using HTML5, CSS3, and JavaScript in an agile workflow (Jan–Mar 2024).
- Languages:** English, Hindi, Marathi
